Art Unit: 3625

Response to RCE

The examiner is receipt of applicant's response to office action mailed 6/19/2006, which was received 12/19/2006. Acknowledgement is made to the amendment to claims 1 and 3-6. The examiner has carefully considered applicant's remarks and arguments including the remarks and amendments discussed in a telephone interview dated 3/16/2007 and found them to be persuasive after the selected amendments provided in the informal amendment discussed in the interview dated 3/216/2007. However, during a final search for non patent literature the following new grounds of rejection is provided.

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Priority

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied

Art Unit: 3625

with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

If the application is a continuation-in-part of an earlier U.S. application or international application, any claims in the new application not supported by the specification and claims of the parent application have an effective filing date equal to the filing date of the new application. Any claims which are fully supported under 35 U.S.C. 112 by the earlier parent application have the effective filing date of that earlier parent application. The disclosure of the prior-filed application, Application No. 09/725,356, 60/219,596, 60/256,946and 60/230,375, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. In this case although the prior filed application support "displaying a keyword list" there is no support for a movable picture display. Therefore the examiner will **consider the priority for the instant invention to be the filing date of the instant application, which is** 11/12/2001.

If applicant desires to claim the benefit of a prior-filed application under 35 U.S.C. 120, a specific reference to the prior-filed application in compliance with 37 CFR 1.78(a) must be included in the first sentence(s) of the specification following the title or in an application data sheet. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the

Art Unit: 3625

reference must include the relationship (i.e., continuation, divisional, or continuation-inpart) of the applications.

If the instant application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional

Art Unit: 3625

information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

Oath/Declaration

It was not executed in accordance with either 37 CFR 1.66 or 1.68.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phases "sufficient to select" and "seller specific" are not

Art Unit: 3625

defined by the disclosure to allow one of ordinary skill in the art to determine the limits of such features.

Claim 1 recites the limitation "seller specific" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5,7,9, and 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Auctiva (a collection of articles found in PTO 892) in view of Fredlund (US PgPub 2003/0058457).

In regards to claims 1-5,7,9, and 10, Auctiva teaches all the features of the instant claims except as follows:

Auctiva teaches a hosted gallery providing thumbnail photos and current bid information, but does not specifically mention that the items are in a movable display. Fredlund teaches selectable images of products to be selected in a movable window that has pictures displayed in a horizontal fashion and has scrolling capability that is controlled by a mouse (FIG 7). It would have been obvious to a person having ordinary

Art Unit: 3625

skill in the art at the time of the invention to include in Auctiva, the scrolling capability as taught by Fredlund, because this would permit the efficient viewing of a large number of items that were for sale by the selected user and increase sales by making the site more user friendly.

Claims 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Auctiva (a collection of articles found in PTO 892) in view of Fredlund (US PgPub 2003/0058457) and further in view of Official Notice.

In regards to claims 6 and 8, Auctiva teaches loading a main program that allows a buyer to view seller items from an auction site that is controlled by a second site and providing a categories list (Auctiva3 with actuating links), but does not specifically mention that the categories provided from the seller match the categories that were assigned to the sellers items at the auction site. The examiner takes official notice that providing selectable categories for limiting items from a large sample of products was old and well known in the art at the time of the invention. It would have been obvious to a person having ordinary skill in the art at the time of the invention to use the categories specified in the initial posting (eposter, Auctiva5) when posting the item to the auction site, since this will create continuity and save time by not having the seller re-categorize the item.

Response to Arguments

Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mark Fadok** whose telephone number is **571.272.6755**. The examiner can normally be reached Monday thru Friday 8:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Jeffrey A. Smith** can be reached on **571.272.6763**.

Any response to this action should be mailed to:

Commissioner for Patents

P.O. Box 1450

Alexandria, Va. 22313-1450

or faxed to:

571-273-8300

[Official communications; including
